Form Week ☐☐☐   * Seq. No. ☐   ** Step No. ☐☐   Key Operator Code ☐☐☐

* Enter a "1" if this is the first of this form for this date. Designate subsequent forms on the same date with a 2, 3, etc.
**Enter the subject's current study step number. Enter '1' if the study does not have multiple steps.

This module captures the general reasons for non-adherence linked to each drug taken. In this step, the interviewer will collect information on reasons why the perinatal study participant may be having difficulty taking each medication.

QUESTIONS 1 AND 2 ARE TO BE COMPLETED BY THE STUDY NURSE:

1. Was the questionnaire completed at this visit? ………………………..…………(1-Yes, 2-No) ☐
    If Yes, go to question 2.
    If No, complete 'a' and STOP.

   a. Indicate the reason the questionnaire was not completed: …   1-Study participant refused   ☐
                                                                     2-Study participant missed clinic visit
                                                                     3-There was not enough time
                                                                     9-Other reason, specify

        If Other, specify [30]: _____

2. Who responded to the questions?……………………………….…………   1-Study participant   ☐
                                                                      9-Other, specify

        If Other, specify [30]: _____

INSTRUCTIONS FOR COMPLETION OF DRUG SPECIFIC TABLE:

- Enter the drug code name of each antiretroviral drug that the study participant is receiving in the space provided at the top of each column. Refer to page 3 for the list of most commonly used anti-HIV medications. Refer to Appendix 3 or the Drug Code Lookup Program at the DMC Web Site (http://www.fstrf.org) for any medications not listed.

Identification of Reasons for Non-Adherence:

READ the following paragraph to the study participant or primary caregiver:
    "Many people at one time or another have trouble with these medications. We would like to better understand the things that make giving medications hard for families. These are some of the reasons others have identified which have made it difficult to take [give] all of the HIV medicines."

Show and read the list of reasons to the study participant or primary caregiver.

After the list is read, ask the following question for each drug (question 3 on page 2):
    "Have any of the following been problems for you with _(drug name or characteristics)_____?"

If "Yes," enter the frequency code for each reason (a-o).
If "No," go to the next drug.
For data entry, use the tab key after the last entry on the page.

DRUG SPECIFIC ADHERENCE DIFFICULTIES:
Frequency Codes

Use these codes to indicate the frequency with which each listed reason for non-adherence occurs. This needs to be done for each antiretroviral drug the study participant is taking.

0-Never a problem
1-Hardly ever a problem (1-2 times per month)
2-Frequent problem (1-2 times per week)
3-Almost always a problem (≥ 3 times per week)
